

Project: AWS EC2 and S3 for Web Hosting

Objective: This project aims to set up a Node.js application on AWS EC2 with an image gallery hosted on Amazon S3. The application features a completion page displaying a personalized congratulatory message.

Verification of Node.js and npm installations on EC2 by connecting through session manager [Systems manager]

```
Session ID: root-7975ohdxgrleh7vebjtegctoyu [Shortcuts] Instance ID: i-0bd5e30ff2cd5c65 [Terminate]

t.amazon-ssm-agent.service snapd.service systemd-journald.service systemd-networkd.service systemd-resolved.service systemd-udev.service udisks2.service
ice

Service restarts being deferred:
systemctl restart ModemManager.service
/etc/needrestart/restart.d/dbus.service
systemctl restart getty@tty1.service
systemctl restart networkd-dispatcher.service
systemctl restart serial-getty@ttyS0.service
systemctl restart systemd-logind.service
systemctl restart unattended-upgrades.service

No containers need to be restarted.

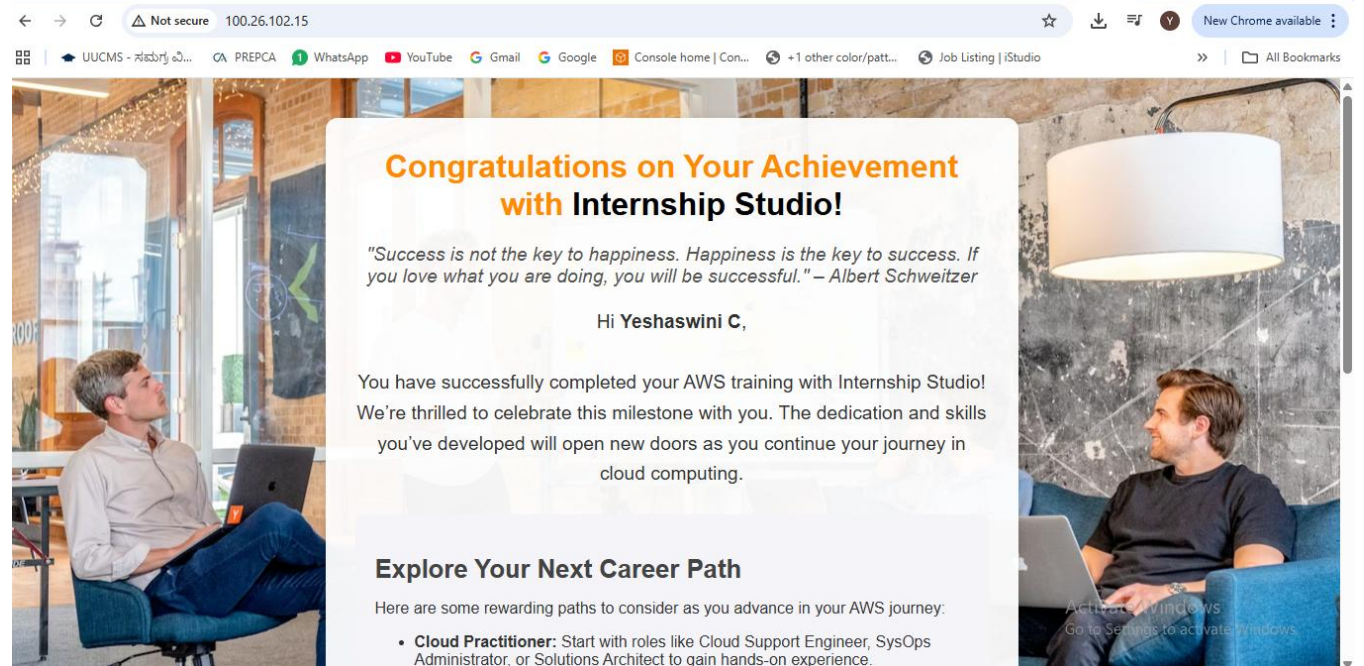

User sessions running outdated binaries:
root @ user manager service: systemd[1136]

No VM guests are running outdated hypervisor (qemu) binaries on this host.
root@ip-10-0-0-29:/projectfiles# npm -v
9.2.0
root@ip-10-0-0-29:/projectfiles# npm install express

added 65 packages in 2s

22 packages are looking for funding
  run `npm fund` for details
root@ip-10-0-0-29:/projectfiles# node -v
v18.19.1
root@ip-10-0-0-29:/projectfiles# npm -v
9.2.0
root@ip-10-0-0-29:/projectfiles#
```

The application's homepage

Screenshot showing images of courses, as accessed from public S3 bucket [3 objects]
